

A Wall Plate Access Point can be mounted into a wall junction box. The junction box should be pre-installed with an in-wall Ethernet cable connected to a PoE switch.

This guide applies to the following EAPs:

Compatible wall junction boxes:

## Installation

**Note:** For simplicity, this guide uses EAP230-Wall and an 86 mm wall junction box for demonstration.

# Configuration

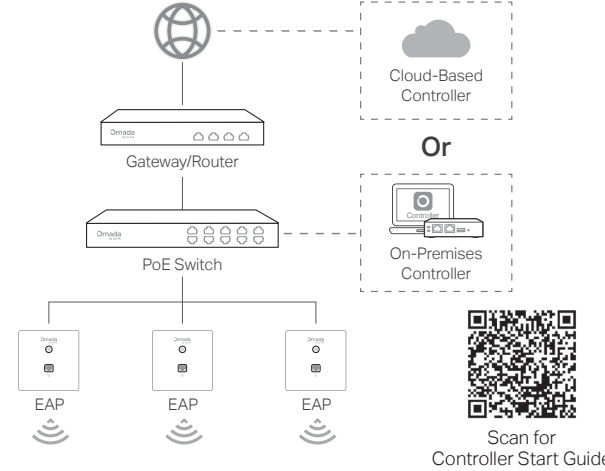

## Option 1: Standalone Mode

Configure and manage each EAP on its standalone page.

## Option 2: Controller Mode

Configure and manage EAPs (and other Omada devices) centrally with an Omada Controller.

## Omada App

With the TP-Link Omada app, you can access and manage your Omada devices at a local site or remotely with a tap of your phone.

## More Configurations

For more configurations, refer to the User Guides of the Omada Controller and Omada Access Points at: <https://support.omadanetworks.com/document/>

## Safety Information

- Keep the device away from water, fire, humidity or hot environments.
- Do not attempt to disassemble, repair, or modify the device. If you need service, please contact us.
- Do not use the device where wireless devices are not allowed.
- This device can be powered only by equipments that comply with Power Source Class 2 (PS2) or Limited Power Source (LPS) defined in the standard of IEC 62368-1.

TP-Link hereby declares that the device is in compliance with the essential requirements and other relevant provisions of directives 2014/53/EU, 2011 /65/EU and (EU) 2015/863. The original EU Declaration of Conformity may be found at <https://www.tp-link.com/en/support/ce/>

TP-Link hereby declares that the device is in compliance with the essential requirements and other relevant provisions of the Radio Equipment Regulations 2017. The original UK Declaration of Conformity may be found at <https://www.tp-link.com/support/ukca/>
