Q & A

Question: When connected in 2.4G wireless mode, the keyboard sometimes lags. How can I fix this?

Answer: Follow these steps to troubleshoot:
 1. Ensure the receiver is inserted in the USB anti-interference cable seat.
 2. Ensure the wireless environment is within 30~100 cm, with no obstacles or metal objects.
 3. Check for strong wireless routers or other wireless transmitter interference sources within 1 meter.

Question: Is there a maximum number of wireless products that can be used in the same environment?

Answer: We recommend 10 units or less. (For more than 10 units, it is recommended to be 1.5m~3m apart)

Question: Does the keyboard support Win/Mac platforms and also Android and iOS platforms?

Answer: Yes, the layout of the Android platform is the same as the Win platform, and the layout of the iOS platform is the same as the Mac platform.

Question: Can the keyboard layout be remembered?

Answer: Yes, the layout you used last time will be remembered.

Question: Does the keyboard remember the connected device?

Answer: Yes, the device you connected last time will be remembered.

Question: Will my Bluetooth device be disconnected if I plug in USB wired cable when using Bluetooth mode?

Answer: No, multi-mode devices need to be switched manually.
