

CORE REACTOR II VE

CORE COMPETENCE

XPG CORE REACTOR II VE - POWER SUPPLY UNIT

XPG CORE REACTOR II VE empowers your system with efficient power delivery. It's compatible with Intel's latest ATX 3.1 design guidelines and has a dedicated 12V-2x6 connector for the latest graphics cards. This unit boasts a DC-DC circuit design for enhanced performance, stability, and consistency, with exceptional ripple control and hold-up time surpassing Intel's specifications. It has 8 industrial protections fortifying its durability, safeguarding both the unit and your system.
